

***** ANNOUNCEMENT *****
WATER METER REPLACEMENT PROJECT
IN FEBRUARY 2022

The City of Shafer is replacing the water meters inside your home or business. **Replacement of the water meter is at no cost to the homeowner** and takes approximately 30-minutes to complete. The water meter is typically located in the utility room or lower level of your home or business.

The City has purchased Kamstrup water meters from Dakota Supply Group and their installer Midwest Testing will be installing the meters **February 14, 2022 through February 24, 2022**. You will receive a notification letter from the City and Midwest Testing in early February with direction on how to schedule your appointment.

Prior to the project starting, please check the following:

- Check the operation of the valve before and after the water meter for leaks and operability (see picture below).
- The shutoff valves before & after the meter are the homeowner's responsibility and needs to be functional for the installation to occur.
- If a valve is defective, contact a local plumber to repair/replace the valve(s) prior to the meter being installed.
- When replacing the valve(s), the water to the home/building will need to be shut off at the curb-stop by the City. Please schedule an appointment 48-hours in advance of the repair by calling the **City Public Works Dept at 651-257-7604**.
- There is no charge from the City for shutting the water off at the curb-stop.

You will receive a letter with directions on how to schedule your appointment at the beginning of February. Please schedule your appointment immediately to help make this a successful project. If you will not be available during this two-week period, please coordinate with a family member, friend, or neighbor to provide access to your water meter.

Thank you for helping make this a successful project.
